## WHY INVEST?

If you keep your money in your pocket or the bank account, it loses its practical value with time. That means, as time passes, you can buy less and less with the same amount of dollars.

By investing your money and increasing their amount, you can at least keep your buying power constant. Investing is also a good source of passive income. ***That means you make money while you are sleeping.*** Sounds tempting, isn't it?

It is always nice to have some extra cash to cover your expenses. But imagine how awesome it would be to pay your monthly bills just by the earnings of your investments and with almost no active involvement from your side! That's kind of a ***“living for free.”***

## WHERE TO INVEST?

Probably you've heard a thousand times how investments can be financial vehicles to help you turn your dreams into reality, but you need guidance about where to start.

***Beyond having the money to invest, where to invest is also an important consideration.***

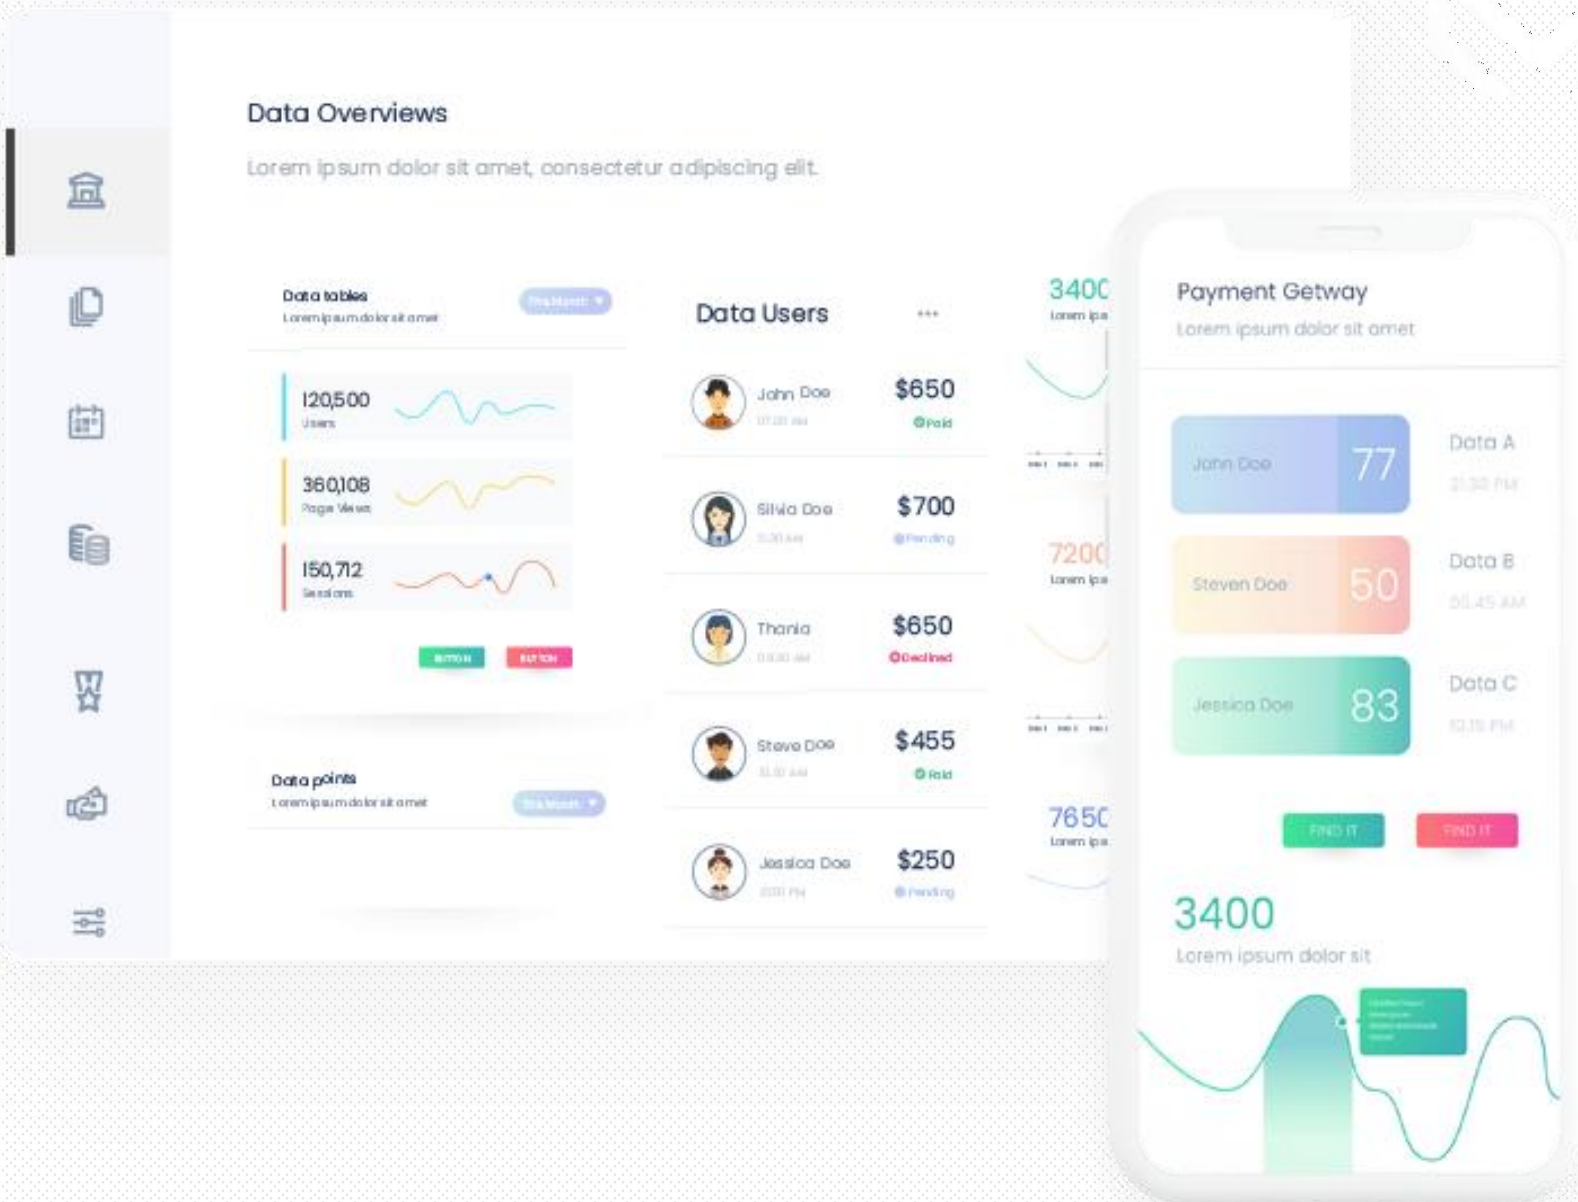

There are different investment options, each offering unique advantages and risks. Hence, it will be advisable to look into some of these investment means to decide which is

most suitable for you.

## THE STOCK MARKET

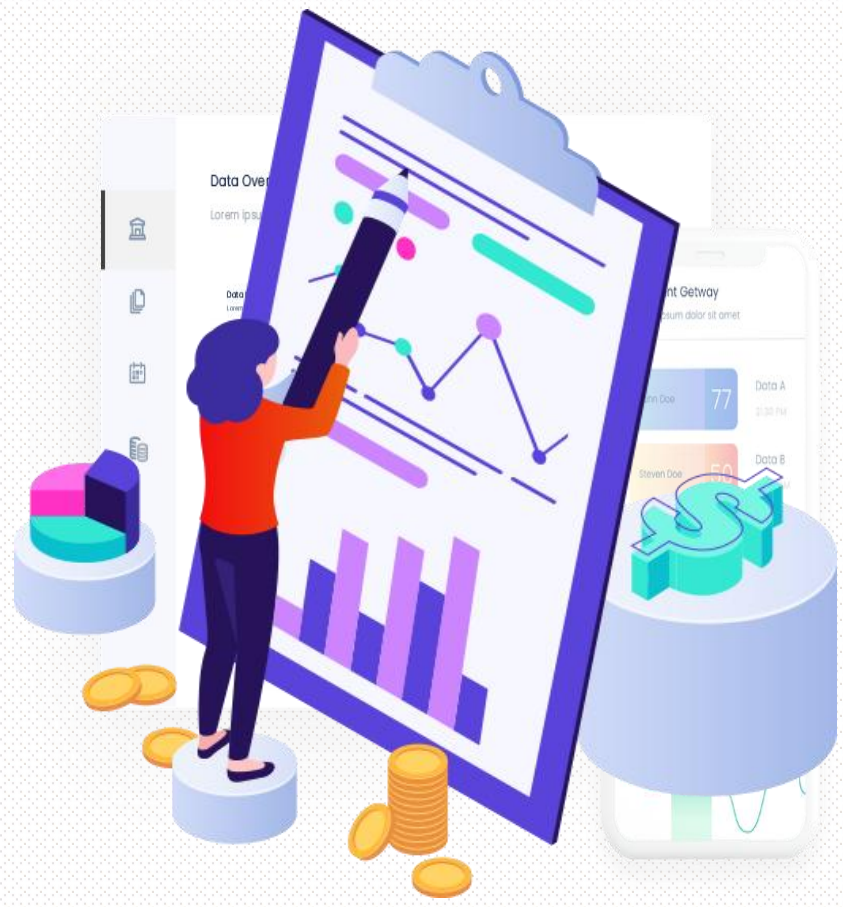

The stock market is one of the most popular investment choices. The stock market is a market that facilitates buying and selling stocks, also known as shares. Stocks here represent publicly traded companies - they allow the public to buy their shares. By buying the shares of a company, you become entitled to the assets and profits of that company. Stocks are, therefore, a financial instrument that

grants you individual ownership of a proportion of a company's assets and earnings. However, the number of shares you buy will determine the slice of the company you own.

## REAL ESTATE

Real Estate investment refers to an investment in properties to yield returns. Real Estate can be one of the best investments because they have low risks as you are not investing your money in abstract things. In addition, with shelter as a basic living need, you may be confident of good returns on investment.

## REAL ESTATE INVESTMENT TRUSTS (REITS)

REITs, or Real Estate Investment Trusts, are like investment funds that invest in real estate properties such as apartments, shopping malls, and office buildings. By investing in a REIT, you can earn a portion of the rental income the properties generate.

REITs are publicly traded on stock exchanges, which makes them easy to buy and sell, but they also come with risks, such as changes in real estate markets and interest rates.

## CRYPTOCURRENCIES

Over the recent years, cryptocurrencies, or simply crypto, have gained massive ground in popularity and usage. The catch about crypto is that it is a very volatile market, so you can take advantage of the volatility if you understand the market well.

You can decide to buy and "hold" crypto assets. That means you buy coins, store them in your online wallet and wait for the prices to spike to resell and make a profit. Due to the fast growth of crypto, it might also be a good option for long-term investments.

## WHAT IS AN INVESTMENT BROKER?

You cannot simply call the public contact number of the company you want to invest in and ask it to sell you some shares. Instead, you need an intermediate who does the transaction for you on your order. These intermediates are called brokers. Their primary role is to facilitate the buying and selling securities such as stocks, bonds, and other financial instruments on behalf of their clients.

Investment brokers provide investment advice, research financial products, and execute trades for their clients. They also help clients make informed investment decisions by providing analysis, recommendations, and market insights. Investment brokers typically earn a commission on the trades they execute on behalf of their clients.

## KEY TAKE AWAYS

You need a broker to access the stock market. The broker will execute the transactions on your orders.

Not every broker provides access to the same range of financial instruments. Consider all commissions and fees. There are many of them, and they are often quite complex.

Be aware of spread. You have zero commission, but you pay more for the stock. There is a vast number of online brokers. Make sure to select the one that meets your criteria best by evaluating your goals first.

## WHO ARE CRYPTOCURRENCIES FOR?

For those who prefer an anti-authoritarian system - Since cryptocurrencies run on a decentralized network, they are immune to government interference and manipulation, such as devaluation, and act as a hedge in case of hyperinflation or the potential collapse of a government.

For those looking for a hedge against future risk in their Portfolio – it is believed that Bitcoin could replace gold in the future as a store of value and act as a hedge against inflation.

For those who think that Crypto is the future - Cryptocurrencies and related technologies are poised to disrupt industries across finance and law, leading to capital appreciation in the future.

## 3 STEPS TO SELECT A CRYPTOCURRENCY

- 1. Understand the Technology: Cryptocurrencies are based on blockchain technology, a decentralized ledger that records all transactions. It is important to understand how the technology works and the potential use cases for the cryptocurrency you are interested in investing in. This can help you assess its long-term viability.*
- 2. Diversify Your Portfolio: It is important to diversify your cryptocurrency portfolio to reduce the risk of loss. Consider investing in multiple cryptocurrencies with different market capitalizations and use cases. This can help you balance your risk and returns.*
- 3. Set your Goals: Cryptocurrency markets can be highly volatile, so it is essential to consider whether your goal is speculating or long-term investment. Evaluate the potential growth prospects of the cryptocurrency you are interested in. Consider holding the investment for a time horizon appropriate to your targets to ride out or on market fluctuations.*
